**What do patients like best about you?**

“My patients tell me in person—and I see this on social media sites where they leave comments—it’s our focus on natural-looking results, followed by our concerted effort to make the procedures as painless as possible with the least amount of bruising. Our lower price point is another factor why patients come here. We treat patients as individuals, not numbers in an assembly line. And I personally take a lot of time and attention to tailor the right procedure for each patient.

The majority of our new patients come in with a legitimate fear of looking overdone. Patients want to be ensured that they will still look like themselves. They want to see a rejuvenated, fresher version of themselves and to eliminate looking sad, angry and tired. We pride ourselves in creating natural-looking results with minimal pain and bruising—and at a super-competitive price range.”

**What is your area of specialty?**

“Cosmetic injectables that are done with a high level of skill and expertise. It is not just about injecting a filler; it is about how you do it and what exactly the patient’s goal is. I know how to achieve a specific result whether using a filler or a wrinkle relaxer.”

**How do you ensure patients’ comfort?**

“Pain sucks ... to put it bluntly. To some doctors, pain is simply part of the process. I strongly disagree. We use the least traumatic approaches currently available for each procedure (and we continue to keep our eyes open for any new improvements!). Take lip injections, for example. Our latest approach (*shhhh! It’s a secret ...*) seems to give the highest satisfaction for our patients. Each area on the face has a different pain threshold, and a different approach is necessary. Experience really does make a difference!”

**Do you offer a free consultation for new patients?**

“Yes, our consultations have always been free of charge.”

**D**r. Sherly Soleiman and her staff at Cosmetic Injectables aim to deliver superior care with a focus on the latest, most effective cosmetic injectables available such as Botox, Dysport, Voluma, Juvederm, Radiesse, Restylane, Perlane, Belotero and Sculptra. After working part-time at various medical institutions for 10 years, Dr. Soleiman opened her own office in 2008.

“We pride ourselves in **CREATING NATURAL-LOOKING RESULTS** with minimal pain and bruising—and at a super-competitive price range.”
